The Budwig Protocol – A Unique Approach to Cancer Treatment

The Budwig Protocol originated with Dr. Johanna Budwig more than 70 years ago and has helped people worldwide tackle every type of cancer head-on. Why does it work so well? Because it targets the root cause of cancer by using a variety of natural herbs, anti-cancer remedies, effective treatments, and cutting edge technology.

The Budwig Protocol – A Personalised Approach

The Budwig Center takes things one step further by ensuring that all treatments, therapies, etc. are personalized. So, before starting one of our cancer or wellness programs, a full medical consultation is required. Then we use our GSR scan and VEGA test to obtain a more in-depth analysis of your general condition of health.

During the program, Dr. Natalia Boiko reviews our patients' medical records and supervises their condition, symptoms, and reaction to treatments. We also provide an oncologist consultation, which enables our patients to examine their options and get another professional opinion on their condition. As the proverb says, *"there is success through many advisers."*

The success of Dr. Budwig's program was in part because it had a whole-person approach. She writes in her book Der Tod des Tumors (Bd. 2) (The Death of the Tumor, Vol. 2), on page 143, on the subject of self-help and treatments she endorsed

"What other therapeutic measures are advisable, permitted, recommended? I always reply: Everyone should do what they can – cold water treatments, hyperthermia, homeopathy, phytotherapy (herbs), even psychotherapy, or sometimes even surgical intervention, depending on the situation."

Therapies Offered at The Budwig Center

Following Dr. Budwig's sterling example, the Budwig Center offers a range of integrative methods and treatments. Our experienced advisors and clinicians make a holistic assessment and work together with clients to work out the best plan of care and the right therapies for the individual. We use up-to-date techniques and technology to tailor our treatments.

The Combination of GSR and VEGA Technology

The Vega and GSR tests employ a full-body scan that will verify all aspects of your health. We identify any underlying issues that may contribute to the health problem.

The major organs (i.e., heart, lungs, liver, brain gallbladder, etc.), the backbone, teeth, tendons, hormones, muscles, parasites, viruses, harmful bacteria, Candida, food intolerances, allergies, infections are analyzed. Additionally, the patient's emotional state is examined, which could be a significant contributing factor to the illnesses.

These tests are integral to our programs' success because some therapies are not advisable for all patients. In such cases, we look for a suitable replacement. Therapies offered are also determined by the program you enroll in, and the time needed to complete the treatment(s).

Full-Body Hyperthermia

Fever is the body's defense mechanism, which is activated when a physical anomaly caused by a pathogen is detected. This mechanism raises the body's temperature to remove the threat and restore normality. In speeding up the metabolism, fever suppresses the spreading of the viral or bacterial invasion.

Hyperthermia is a therapeutic procedure that raises the temperature without damaging healthy cells. Several other methods induce a rise in body temperatures, such as total immersion in hot water, ultrasound, and sauna, to name a few.

Four-In-One Holistic Therapy

Dr. Johanna Budwig was continually talking about the benefits of sunlight and natural heat. More and more scientists are discovering that she was ahead of her time in this research.

Studies were being carried out in these fields by NASA as far back as the 1960s. A further study in 1981 confirmed that infrared rays of 2 – 25μ of wavelength in the sunlight are necessary for life. They also discovered that 4–14μ of Far Infrared radiation is indispensable for metabolism, rejuvenation, healing, and growth. It's also essential to make heat and energy occur by a resonance action within cell molecules of the human body.

Cell Sonic Electrohydraulic Therapy

Our body is electric, and each cell has a positive and a negative charge, just like a battery. Tests show that healthy cells have a membrane potential of about -60 to –100mV instead of -15mv in cancer cells.

Therefore, from a scientific point of view, cancer is a developmental disorder of cell regulation, where there is a loss of the organizational capacity of the surrounding environment.

The Cell Sonic Electrohydraulic therapy device switches the electrical polarity of the cells back to the correct alignment. When cells replicate, instead of copying mutant rogue cancer cells, the cells replicate themselves correctly. The electrical properties of cancer cells are the clue to this treatment.

Phyto-therapy

Dr. Budwig approved the use of plants in her remedies. We have selected plant extracts in liquid, capsule, and powder form to address parasites, harmful bacteria, and fungus for detoxification measures.

- **Homeopathy** is an effective natural alternative in treating a host of conditions.
- **Essential oils** – such as frankincense, myrrh, Magnolia, and Artemisia.
- **Immune Enhancement Therapy** using transfer factors, which are the secret of the immune system. Once we remove the protective protein-membrane from the cancer cells using our fruit extract formulas, the Transfer Factor immune supplements will be able to effectively restore the immune system to its full potential to deal with cancer and unwanted pathogens.
- **Pain Therapy** – Using the Health Pulse device and selected herbal and plant extracts, we can help patients naturally reduce even severe pain.
- **Viral Treatments** using essential oils, diatomaceous food grade earth, herbal and homeopathic formulas
- **Enzyme and Fruit Extract Formulas** disables the protective membrane around cancer cells.
- **Medicinal Mushroom Extracts** boost the immune system and regenerate nerve sensibility and offset the effects of chemotherapy and radiation.

Tom, Brain Tumor

I thought my husband to the emergency room with a splitting headache and projectile vomiting. We thought it was a bad migraine bu... Tom's three months MRI looked good, his brain was clean and the hole where they removed the tumor was empty except for a tiny line around ... For the first three months, I also rubbed Frankincense on his head because it is supposed to have anti-cancer properties.
